

Kwik Tilt Sine & Tilt Tables

THE KWIK TILT EYEBALL

\$575.00

OR

THE KWIK TILT POLYGON

\$525.00

The range of the **Eyeball Kwik Tilt** is from -60° to $+60^{\circ}$ compared to 0° to 60° (in 15° increments) for the **Polygon Kwik Tilt**. For either unit, just use your existing vise that you have set up on your mill. No need to clear and clean the machine table or remove existing set-ups. Simply set the **Kwik Tilt** into your vise so that the unit is sitting on top of your jaws. Set your angle and clamp. You can mount a vise, collet fixture or any other workholding fixture or tool.

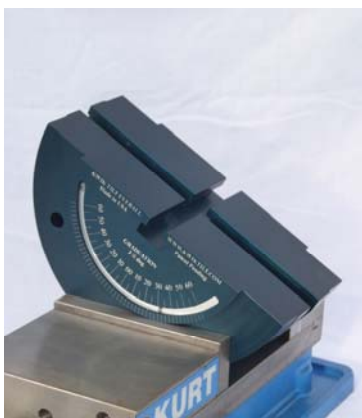

When the job is finished, remove the **Kwik Tilt** from the vise and you are ready for your next set up. **Kwik and Easy!** Order yours today and start saving time on set-ups, while increasing your profits.

Requirements:

Use Non Lifting Jaw Vises such as ACCU-LOCK™ type. Jaws must be 1.625" height minimum (both same size) and 6" long minimum.. Machine table must be leveled.
